1. Claim 6 is objected to because the same does not end in a period.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has set forth in claim 1, lines 3-5 that parts of both a power tool and a recharging stand are received within a receiving bay within a casing in the battery pack. As set forth in the present specification, only one of the parts of either the tool or the stand can be received within the bay at one time. Amendment of claim 1 is required.

Claims 2-14, dependent on claim 1, fall therewith.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

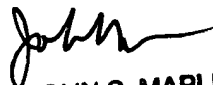

The closest prior art, Shimma et al. teach an extra electrical contact between the terminals of a battery pack of interest; Liebler also set forth three contacts in a battery pack and both Marshall et al. and Mooty et al. describe various other battery packs of interest.
